

**ESTABLISHED IN 1928**

**APPLICATIONS**

**SURFACE WATER TREATMENT**

**MEMBRANE PRETREATMENT**

**NITRATE REMOVAL**

**PERCHLORATE REMOVAL**

**DEMINEALIZERS**

**TURBIDITY REMOVAL SYSTEMS**

Loprest Water Treatment Company is privately owned corporation that manufactures water and process purification systems for municipal, industrial, food and beverage processing and utility markets.

Loprest will supply systems from as low as 10 gpm to over 10,000 gpm. Loprest provides turbidity removal systems with either mono layer or dual media designs.

Loprest systems have been used to produce boiler feed water, potable water purification, whey purification

and beverage purification among many other applications.

For over 80 years we have kept pace with water treatment and food and beverage purification needs as dictated by local, state and federal regulations. From our first installation in the 1920's to the current computerized, technologically advanced equipment our customers have learned that Loprest Water Treatment provides continuing service and dependability.

Every Loprest Water Treat-

ment Company system is designed, manufactured and tested in our facilities in Rodeo, CA. Our on-site facilities include a machine shop with orbital welding equipment for the fabrication of stainless steel vessel internals and industrial or sanitary stainless steel process piping. Our assembly area is capable of providing skid mounted equipment and our UL Listed panel shop builds our custom computerized control systems.

**STANDARD WATER TREATMENT SYSTEMS DESIGNED AND FABRICATED BY LOPREST INCLUDE:**

- Clarifiers
- Multi-Media Filters
- Iron & Manganese Removal Filters
- Granular Activated Carbon Filters
- Softeners
- Arsenic Removal
- Demineralizers
- Multi-Cell Pressure Filters
- MTBE Clean-Up
- Perchlorate and Nitrate Removal Systems
- Aerators
- Groundwater Clean-Up
- Degassifiers
- Air Stripping Towers
- Pressure Contact Clarifiers
- Dual Stage Pressure Filters
- Packaged Water and Wastewater Treatment Systems
- Filter Media Replacement
